

Clearer Charts for Serious Fishing & Cruising

- Plan your navigation on PC
- Manage routes and waypoints on your chart
- View Navionics Gold charts on your PC
- USB chart reader & worldwide chart included

Waypoints & Routes:

Download existing routes and waypoints from your plotter to your PC, or create new routes and waypoints on your PC that can be taken on a cartridge to your boat. Using the NavPlanner's multimedia adapter, save your new waypoints and routes to CF, SD, or MMC cartridges. NavPlanner provides choices to save in formats compatible with leading chartplotter manufacturers.

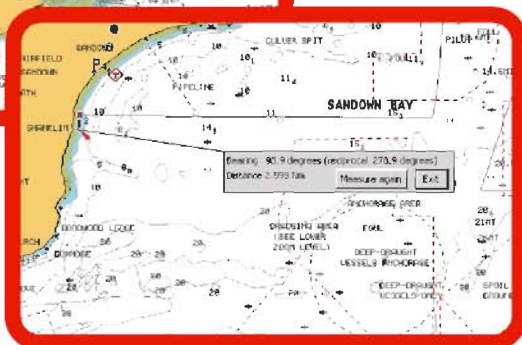

Easy to Use Navigation Tools:

NavPlanner's intuitive format provides mariners with helpful information and easy to use navigation tools that are essential for planning safe and accurate routes.

Go-to-port

Quickly Locate port and port information with NavPlanner's Go-to-port feature

Distance

Measure distance and bearing between two points

Compatible Chartplotters:

NavPlanner is compatible with plotters using Navionics Gold charts on CF, MMC & SD cartridges. For a complete list of Navionics Gold chart compatible plotters, please visit our website www.navionics.com.

NavPlanner includes CD-ROM, Multimedia Card Reader.
